

## What is the monthly cost to operate your home appliances?

The basic measure of electricity is the kilowatt-hour (kWh).

Your monthly electric bill contains the number of kilowatt-hours you have used with the addition of system charges and applicable taxes. The following information contains rough estimates of the cost of operating an appliance each month based on the wattage of the appliance, the estimated hours of use per month, and the cost per kWh for electricity. To find your own rough estimate for the cost of operating one of your appliances you can use the formula below. To figure out the wattage of the appliance either use  $Volts \times Amps = Watts$ , check a listing online, or see the appliances guide.

The current Pepco residential rate, effective June 1, 2022, is: **\$ 0.0844/kWh**

$$\begin{aligned} & (\text{Watts} \times \text{Hours of Use}) / 1000 = \text{kWh} \\ & \text{kWh} \times 0.0757 = \text{Monthly Operating Cost} \end{aligned}$$

<u>Heating &amp; Lighting</u>	<u>Avg. Wattage</u>	<u>Est. Hours/Month</u>	<u>kWh/Month</u>	<u>Cost/Month</u>
Air Conditioner	3000	270	810	\$ 68.36
Air Conditioner-Window Unit	1100	270	297	\$ 25.07
Air HEPA Filter	250	720	180	\$ 15.19
Ambient Fireplace w/Heat on HIGH	1500	120	180	\$ 15.19
Ambient Fireplace w/Heat on LOW	750	120	90	\$ 7.6
Baseboard Heater 4ft	1000	360	360	\$ 30.38
Baseboard Heater 6ft	1500	360	540	\$ 45.58
Block Heater	1000	240	240	\$ 20.26
Cadet Wall Heater	1000	360	360	\$ 30.38
Ceiling Fan	65	120	7.8	\$ 0.66
Fluorescent Light Fixture	96	240	23	\$ 1.94
Light Bulb: 100W Incandescent	100	240	24	\$ 2.02
Light Bulb: 60W Incandescent	60	240	14	\$ 1.18
Light Bulb: CFL 13W (60W equivalent)	13	240	3	\$ 0.25
Light Bulb: CFL 26 W (100W equivalent)	26	240	6	\$ 0.5
Light Bulb: LED 9W (60W equivalent)	9	240	2	\$ 0.17
Portable Space Heater (including oil filled)	1000	360	360	\$ 30.38

The information above is based on the average usage of a family of four, all factors can vary. The wattage listed on the tables is an average, it may vary depending on the size, model, and condition of the appliance as well as any special features and the condition of your home's wiring.

The estimated kWh consumption will also differ based on the size of the home, its insulation levels, and individual use habits. If you have any questions regarding home energy usage or energy efficiency visit
